

Important Notice to Our Customers

Product Change Notice 251030A
October 30, 2025

Subject:

End of Service (EOS) and End of Life (EOL) for Jerome® X431 Mercury Vapor Analyzers

AMETEK Brookfield is committed to providing reliable, accurate, and innovative solutions for hazardous gas and vapor analysis. This notice is to inform you that, due to the age and limited availability of parts for the Jerome X431 Hg(g) Mercury Vapor Analyzer, we will be discontinuing support according to the following schedule:

Key Dates	Date	Description
End of Service (EOS)	December 31, 2025	Repair services for Jerome X431 end
End of Life (EOL)	December 31, 2026	Calibration services end; product fully retired

Product(s) Affected: Jerome X431 Mercury Vapor Analyzers

What This Means for You:

- After the EOS date, December 31, 2025, repair services will no longer be available.
- After the EOL date, December 31, 2026, calibration services will end and Jerome X431 will be fully retired.

Customer Impact and Transition Guidance:

To ensure uninterrupted monitoring and compliance, we encourage all customers to consider upgrading to the **Jerome® 405 Mercury Vapor Analyzer** or our latest model, the **Jerome® J505 Mercury Vapor Analyzer**.

The **Jerome J505** offers advanced technology, improved sensitivity, and a streamlined user experience. With its enhanced performance and reliability, the Jerome J505 is designed to meet the evolving needs of mercury vapor analysis and deliver peace of mind for years to come.

For details on our full range of hazardous gas and vapor analyzers – including the Jerome J405 and Jerome J505 – visit www.brookfieldengineering.com or contact AMETEK Brookfield for expert recommendations.

Thank you for your continued support. We're here to help you transition to the next generation of Jerome analyzers.
