Choosing the Right Software – DV Create™ vs DV360™

With the DV2Plus viscometer setting the global standard in viscosity measurement, selecting the right software can significantly enhance workflow efficiency. AMETEK Brookfield offers two software platforms – DV Create™ and DV360™ – each tailored to meet distinct user needs and laboratory environments. We encourage customers to evaluate their workflow requirements and choose the software that best aligns with their operational needs.

Software Comparison Overview:

DV Create™ is best suited for:

- Basic laboratory workflows
- Users transitioning from PG Flash
- Simple, step-based test programming (up to 25 steps)
- Automatic data transfer to PC

DV360™ is recommended for customers that:

- Run tests directly from the PC
- Perform mathematical modeling
- Customize reports
- Compare or analyze data
- Require compliance tools (21 CFR Part 11, logins, audit trails, etc.)

Feature Comparison Table:

Feature	DV Create™	DV360™
Run Test from PC	✗	☑
Real-time Monitoring	☑	☑
Program Creation & Transfer	☑ (USB/Bluetooth)	☑ (Direct control)
Mathematical Modeling	✗	☑
Custom Reports	✗	☑
Data Comparison & Analysis	✗	☑
21 CFR Part 11 Compliance	✗	☑
Multi-Instrument Control	✗	☑
Automatic Data Transfer	☑	☑
Multi-step Programming	☑	☑
